

An Arrival in Our City Which Will Interest Those Who Have

RHEUMATISM

Sciatica and Neuritis

Three diseases which have plagued humanity with needless pains and aches for centuries, attacking people of all ages and ages, and defying doctors, are RHEUMATISM, SCIATICA and NEURITIS.

Should it become known that a physician living here could RELIEVE EVERY CASE of these stubborn diseases, the sufferers of this and surrounding cities would crowd his office.

One physician in New York—a specialist in his profession, has been able to do this—RELIEVE PRACTICALLY EVERY CASE PRESENTED TO HIM, with a prescription which is known as "NURITO." It is an ethical prescription and contains neither opiates nor narcotics, and it has proven itself in more than 45,000 cases to be a positive antidote for the use, acid, in the system which causes rheumatism, sciatica and neuritis.

"Nurito" is one of the NOTEWORTHY ACHIEVEMENTS of the medical profession in these days of rapid advancement. It is NOT a patent medicine and must not be subjected to the prejudice which exists against nostrums.

No dieting is necessary—on the contrary, you are recommended to eat your usual allotment of food. No matter how badly you are suffering, you will begin to feel the medicine work at once. Come in and let us tell you about it—look at the proofs, backed by affidavits. The physician who can relieve every case is not here in person, BUT THE MEDICINE THAT HE PRESCRIBES IS HERE.

"Nurito," which is in powder form, sells for \$1 and \$2 a box. To try it means to be convinced—to replace your pains and aches with enthusiasm for this advancement in medicine. Magistral Chemical Company, Flatiron Building, New York.

RED CROSS PHARMACY, E. A. DROWN,
and All Other Leading Druggists.

MONTPELIER.

Frank Meehan Fined \$300 and Costs of \$92.26 for Illegal Deer Shooting.

Frank Meehan was fined \$300 and costs of \$92.26 in supreme court yesterday for illegal deer shooting. He paid the fine and costs.

Three new members were admitted into the board of trade last evening, two resigned and two were dropped for non-payment of dues. The real estate committee reported progress and the transportation committee reported it had been successful in having the Wells River station kept open until the arrival of the 10 o'clock evening train.

Charles Parker gave a dinner at Miller's inn last night to the ushers who were to take part in the Parker-Martin wedding to-night.

Montpelier high school defeated the seminary yesterday 6 to 0 in a football game.

Miss Bertha Rice, a former employee in the Buswell book store in this city, and Samuel G. Cannon of Middletown,

FITS St. Vitus Dance, Falling Sickness

respond immediately to the remarkable medicine that has for over 10 years been a standard treatment for these troubles—**Dr. Kline's Great Nerve Remedy**. Doctors prescribe it especially for these diseases; it is not a cure-all, its beneficial effects are immediate. Druggists everywhere sell it. To prove its wonderful virtues, we will cheerfully send a Full \$2.00 Supply without charge.

Kline Laboratories Dept. 52, N. Y. City

ELECTRICALLY LIGHTED COUNTRY PLACES

Why Don't You Light Your Country Place by Electricity?

We can light your house, grounds, barns, creamery, or any buildings, by electricity at no more cost than kerosene. Easily operated and kept in order—cost within reach of anyone—NOT an expensive outfit. The cost averages 1-3 or less than you will pay for current bought of an ordinary company.

Ask for our new Catalogue D which will give you full particulars. Write us or see C. E. Searles, our general agent at Barre, or J. L. Arkley, Barre.

Brackett Shaw & Lunt Co.,
Somersworth, N. H. Boston, Mass.

24 Years' Work No Repairs

A Sharples Dairy Tubular Cream Separator has done work equal to 24 years in a 10-cow dairy without needing adjustment or repairs. Here is the record:

Hours in use.....	1,200
Pounds separated.....	1,080,000
Turns of crank.....	3,155,790
Turns of bowl.....	1,152,000,000
Oil used.....	Only 3 quarts
Time oiling.....	About 4 minutes
Adjusting and repairs: None	

Every Tubular is just as durable, just as well made and just as economical as that one.

The Tubular is the only separator holding such a record—the only separator that could stand such a test. Dairy Tubulars have waist long supply cans—enclosed self-oiling gears—a simple bowl suspended from a frictionless ball bearing. I handle Tubulars and want to show you that they increase dairy profits 25 to 150 per cent. Come in when you can. Let me give you a catalog.

GROTON.

"Town Clock" Now Placed in Tower of Methodist Church.

The work of placing the clock in the tower of the Methodist church has been completed and it is now in running order. The clock was the generous gift of Mrs. M. J. Ricker Hall, and while it adds much to the attractiveness of the village, it is also a convenience to the people that cannot fail to be appreciated.

Bart Ricker and Miss Agnes Taylor were visitors in Barre Saturday and Sunday.

Mr. and Mrs. J. T. Darling and Mrs. J. H. Taisey were in St. Johnsbury on Tuesday.

Elisha May of St. Johnsbury was a business visitor in town on Saturday.

Miss Nellie Tiltonson of West Topsham was at the home of her brother, Dr. H. L. Tiltonson, on Saturday.

Mr. and Mrs. Ernest Taisey and little son left Tuesday to visit friends at Boston and Dorchester, Mass.

Mrs. Lena Heath returned the last of the week from a stay of several days in Littleton, N. H.

A son was born Saturday morning to Mr. and Mrs. Ralph Evans.

Mrs. Charles Heath visited her brother, George Church, at Bradford over Sunday.

Bernard Brink moved on Saturday from the house of Stephen Frost to the tenement house of B. S. Eastman.

Mrs. Helen Welch and Mrs. William Welch were visitors at Montpelier Saturday.

Rev. and Mrs. P. A. Smith of Bradford were among those in town Monday and Tuesday to attend the Methodist District association meeting held here on those days.

Miss Mary Hall was home from Montpelier seminary over Sunday. She was accompanied by a young lady friend.

Misses Jessie Smith and Reta Welch were at Woodsville, N. H., Tuesday.

Mrs. Abbie Balch of St. Johnsbury, Miss Emma Glover of Montpelier and Edward Simms of Boston were guests of Mrs. Helen Welch over Sunday.

Mr. and Mrs. Victor Page and Mr. and Mrs. Wallace Page of Barre were here on Friday to attend the funeral of the little son of Mr. and Mrs. Roy Vance.

RANDOLPH.

Mrs. Martin Washburn arrived here on Tuesday from Underhill, where she has been for two weeks with relatives, and is now with Mrs. B. D. Dufrais for an indefinite period.

Mrs. A. L. Stearns, who has been in Bethel for the last two weeks, was in town Tuesday and after a few weeks will go to Detroit, to pass the winter with her sister.

Miss Julia Slack, who has been here with her brother, R. H. Slack, and family for the last three weeks, left on Tuesday for Leonminster, Mass., to pass the winter with her mother, Mrs. Alda (Slack) Phillips.

Mrs. Roswell Holbrook left Tuesday for Roxbury to pass a week with relatives and friends.

Mr. and Mrs. Chester A. Kent and Dan Kent of Lisbon, N. H., arrived here on Monday with the remains of their father, Horace Kent, and on Tuesday they took the body to East Randolph, for interment in the family lot there.

Mrs. J. E. McCall of New York City has arrived and is now the guest of Mrs. F. A. Eaton, while attending to some business affairs here.

William Reynolds and family, who are to leave here in about three weeks, have leased their house, furnished, to William Gerrow, who has been at work on the school building for the last few months.

Mrs. A. C. Bailey, and her daughter, Mrs. Lettie Bailey Smith, went to Brookfield on Tuesday, to visit Mr. and Mrs. Smith for a short time.

Mrs. Chester Hood from South Royalton, was in town on Monday, to attend the auction of the household effects of the late Dr. S. N. Gould, and Mrs. Gould, his wife. The latter has no definite plans for the future, but will give possession of the house soon.

Hogs—275, 6½¢@7¼¢.
Cattle—200, 2¢@3¢.
Calves—380, 3¢@7¢.
Milk cows—30, \$23¢@30¢.

IN BOSTON MARKETS.

Henney Eggs Scarce and Prices Firm—Butter Market Quiet.

Boston, Oct. 10.—The demand for butter is still very quiet in the local market, and dealers are having some trouble in effecting sales at the prices they ask. A lot of strong butter is being used, and the only excuse for the present quotations seems to be the cost to the wholesalers. The cheese market also is quiet, but bullish advice from the country restrain sales at the expense of prices. At the same time, however, sales at the extreme quotations are few and small. Henney eggs are scarce and in demand at 4¢ prices, but there is very much less call for the other grades, prices of which are no more than steady.

Jobbing quotations:
Butter—Fancy northern creamery, tubs 33½¢@34¢, boxes 34½¢@35¢, prints 33¢@34¢, fancy western creamery, spruce tubs 33½¢@34¢, ash tubs 32½¢@33¢, good to choice creamery 29¢@31¢.
Cheese—New York twins, fancy 18½¢@19¢, fair to good 17¢@18¢, Young America 19¢@20¢, sage 19¢@19½¢.
Eggs—New York henry 46¢@48¢, choice eastern 42¢@44¢, fresh western, extra 39¢@41¢, firsts 32¢@34¢, storage 26¢@28¢.

CATTLE PRICES WEAKER.

Fairly Heavy Supply and Slack Demand at Brighton.

Brighton, Mass., Oct. 10.—Fairly heavy cattle receipts in the Brighton market yesterday morning and a slack demand broke prices on beef cattle, but other quotations were steady and unchanged.

During the week the arrivals at Brighton included 5 cars from the Boston & Albany, 29 cars from New York state, 11 cars from the west, and 3 cars of sheep for export. Receipts at Watertown for the day were 35 cars, including all kinds of stock.

Choice, heavy cattle were again scarce, and heavy steers would have brought 7½ to 8 cents if any had been available. Offerings were sold at 6½ to 7¼ cents, with a few at 7½ cents. Average cattle sold at 5½ to 6½ cents, and ordinary lots at 4½ to 4¾ cents. Beef cows were easier, under a heavy supply of low-grade stock. The best cows sold at 4½ to 5 cents, with ordinary cows at 3½ to 3¾ cents. Canners were easier at 2½ to 3 cents. Bulls were steady at 3½ to 4 cents for the best and 2½ to 3 cents for bolognas.

Veal calves were firm and prices were well sustained, at 8 to 9 cents for the best, 6 to 7 cents for average and 4 to 5 cents for grassers.

Hogs were also firm, but heavy hogs were in better supply. The best heavy hogs brought 8 to 8½ cents, and occasionally a little more. Ordinary stock and smaller pigs sold at 6 to 7 cents and boars at 3 to 4 cents.

SHORT-SIGHTED FARMING CARRIED ON IN VERMONT

Suggestions Made by E. S. Brigham to Remedy Certain Faults of Farming—His Article Here Published.

"Short-sighted Farming" is the subject of an article prepared by E. S. Brigham of St. Albans for the Vermont commission on the conservation of natural resources. Mr. Brigham says:

"Since animal life can be sustained directly or indirectly only by food produced from the soil, it is fortunate for the welfare of the race that agriculture differs from the other so-called extractive industries in that by proper methods of fertilization and rotation of crops the fertility and, therefore, the crop-producing power of the soil may not only be maintained but may be increased, where as the mine can come to but one ultimate end, namely, exhaustion.

"As evidence of this permanency of the soil we may instance the example of China and Japan, which are to-day producing large crops on land that has been cultivated for more than three thousand years. We may say, then, that from the standpoint of the general welfare any system of farming which does not at least maintain the food-producing power of the soil is short-sighted farming.

"It is no exaggeration to say that the greater part of the farming in this country has been short-sighted farming. The natural fertility of our soil, the immense acreage of which we were possessed, and the policy of the federal government of parceling out the public domain to settlers who would live upon it have tended to make us careless of soil fertility. It mattered little to the farmer that he exhausted his soil, if his son could go West and get free of charge 160 acres of virgin soil, and it mattered little to the town that the soil of its countryside declined, so long as its food could be transported from a distance cheaper than it could be produced at home. The result of this policy has been that our people have lived lavishly upon the bounty of a new land, taking no thought of the morrow, until now the price of food has increased to such an extent that the high American standard of living is threatened and far-seeing public men point out the danger of a food shortage if our population keeps increasing at the present rate.

"The question now is, What are we going to do about it? The answer usually given is, 'More education for the farmer,' which is good so far as it goes. Good farming practice is based upon certain laws of nature, with which man must co-operate, since he cannot change them. Jugglery brings no reward in dealing with Dame Nature. As Prof. Carver aptly expresses it, 'Neither impudence, nor a smooth tongue, nor a distinguished manner, nor lurid rhetoric, ever yet made an acre of land yield a larger crop of grain; but they have frequently made an office, a sanatorium, a platform, and even a pulpit, yield a larger crop of dollars.' Since success in farming depends upon an understanding of these laws, it is good policy for the state to make it easy for those who desire to gain access to this knowledge.

"The causes of soil exhaustion, the elements of plant food which are likely to become deficient in the soil, the means of maintaining a proper physical condition of the soil so that its texture and its water-holding capacity may be preserved, should not only be taught in our schools, but should be made accessible to those too old to go to school by means of college extension courses. With better education, we might reasonably expect to see better organization of the business of farming, more careful saving of all manurial wastes of the farm, more intelligent purchase of fertilizing materials, and a counting in the cost of production the cost of putting back in the soil the amount of fertility removed by the crop, without which we cannot hope to keep up the producing power of the land.

Farmer Needs Co-operation.

"But the problem of short-sighted farming cannot be solved by farmers alone. There are certain phases of this question which should be considered by all thoughtful people. Conservation simply means saving—the denial of some of the wants of to-day that the needs of the future may be supplied. During the last third of the past century, farm products often sold for barely enough to pay for the labor of producing them. In that time of great better organization of the business of farming, more careful saving of all manurial wastes of the farm, more intelligent purchase of fertilizing materials, and a counting in the cost of production the cost of putting back in the soil the amount of fertility removed by the crop, without which we cannot hope to keep up the producing power of the land.

"Now that land is becoming more scarce and more capital must be used in the business of farming, if the cost of keeping good the fertility of the soil is added to the cost of production, and if the farmer receives the profit to which he is entitled, we cannot expect to retain our present expensive method of getting farm products from producer to consumer without having the cost of living burdensome to the people. European countries have found relief in parcels post and in co-operative societies and among buyers. Why not we?

"Our aim should be neither high prices nor low prices regardless of future consequences, but rather to secure an abundance and permanent supply of food for the people at a fair price to them and at the same time at a fair price to the producers, for in this way alone can the men be kept on the land who will do away with the short-sighted farming."

A Log on the Track

of the fast express means serious trouble ahead if not removed, so does loss of appetite. It means lack of vitality, loss of strength and nerve weakness. If appetite fails, take Electric Bitters quickly to overcome the cause by toning up the stomach and curing the indigestion. Michael Heschmer, of Lincoln, Neb., had been sick over three years, but six bottles of Electric Bitters put him right on his feet again. They have helped thousands. They give pure blood, strong nerves, good digestion. Only 50 cents at the Red Cross Pharmacy—Advt.

CASTORIA

For Infants and Children.

The Kind You Have Always Bought

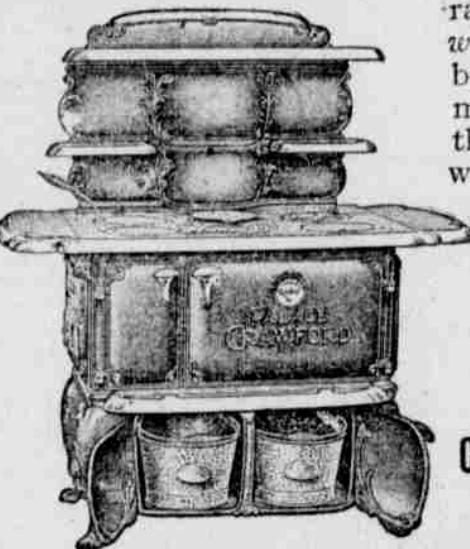

Bears the Signature of J. C. Watson

Crawford Ranges

One very remarkable fact in connection with Crawford Ranges is that nobody ever willingly changes from a Crawford to a range of any other make.

There must be a reason—we believe there are several. The Single Damper (patented,) the scientific Cup-Joint Oven Flues that heat the oven in every part alike; the Ash Hod (patented,) instead of the clumsy ash pan; these are some of the Crawford time and trouble savers.

If you will carefully examine and compare the Crawford with any or all other cooking ranges you will see why Crawford do better work, with more comfort for the cook and less waste of time and money. Send for the illustrated pamphlet.

The Youth's Companion for 1913.

The Youth's Companion appeals to every interest of family life, from housekeeping to athletics. It begins with stories of youthful vim and vigor, with articles which disclose the secrets of successful play in the great games, with charming tales of life at the girls' colleges. But The Companion does not surrender these readers when they have entered the more serious paths of life. Mothers will welcome the page for little children and the weekly doctor's article. Fathers will find the important news of the day as it is, and not as it is rumored to be. The entire household will appreciate the sketches which touch gently on common foibles or caricature eccentricity. In short, for less than four cents a week The Companion brings into the home clean entertainment, pure inspiration, fine ideals, increase of knowledge.

Names rarely seen in tables of contents will be found in The Companion's announcement for 1913, which will be sent upon request—with samples of the paper, to those not familiar with it.

Every new subscriber for 1913 will receive free all the issues for the remaining weeks of 1912; also, free, The Companion window transparency and calendar for 1913, in rich translucent colors, —the most beautiful of all Companion souvenirs. The Youth's Companion, 144 Berkeley street, Boston, Mass.—Advt.
